PRIMA PTF

YOUR PRODUCTS – JUST WITHIN A GRASP!

PRIMA PTF (MANUAL PUSHER „PULL TO FRONT“)

CLOSING SHELF GAPS IN NO TIME!

After shopping a gap is left in the shelf reducing visibility and access to products remaining on the shelf.

The new manual pusher made by OECHSLE is putting things right. Using the **PRIMA PTF** (=pull to front) means to close such gaps in no time.

The **PRIMA PTF** can be adjusted to product widths from 75 to 105 mm. It is especially recommended for bottles, but also for products in stable packs and with a straight bottom, it helps to minimize shelf care.

No assembling is needed when using **PRIMA PTF**. Just set the **PTF** frame to the required width (see image right, below). The flexible plastic rear section will adjust to this size automatically. Put the manual pusher onto the empty shelf and fill it with products (image right). That's all needed to be done!

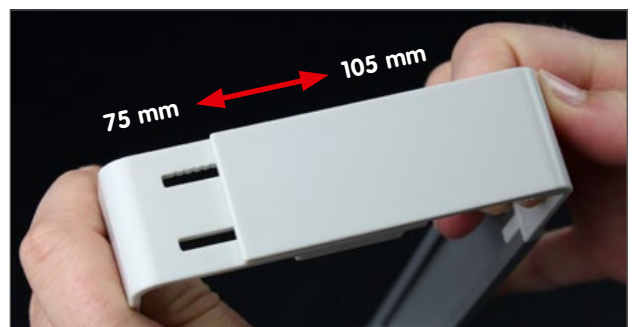

A front rail with an upright does prevent from unauthorized pulling. After shopping has left a gap, just lift up the PTF frame a bit and pull it forward until remaining products arrive at the front. Then put it back securely behind the front rail.

Please contact us, we gladly will advise and support you!

Advantages at a glance:

- Infinitely adjustable for products from 75 to 105 mm width or diameter
- For shelves 300 to 500 mm deep, other measurements upon request.
- No assembling: put onto shelf – place products – go!

Together we form an unbeatable team
